

Year 1: Creating and Following Instructions

Themes

- What instructions are
- Why instructions are important
- Following and creating instructions on the computer
- Algorithms

Algorithm

A precise, step-by-step set of instructions used to solve a problem or achieve an objective.

Scan the QR code to listen to these instructions

Put the black pieces in a line on top of the red pieces with the slopes at the end.

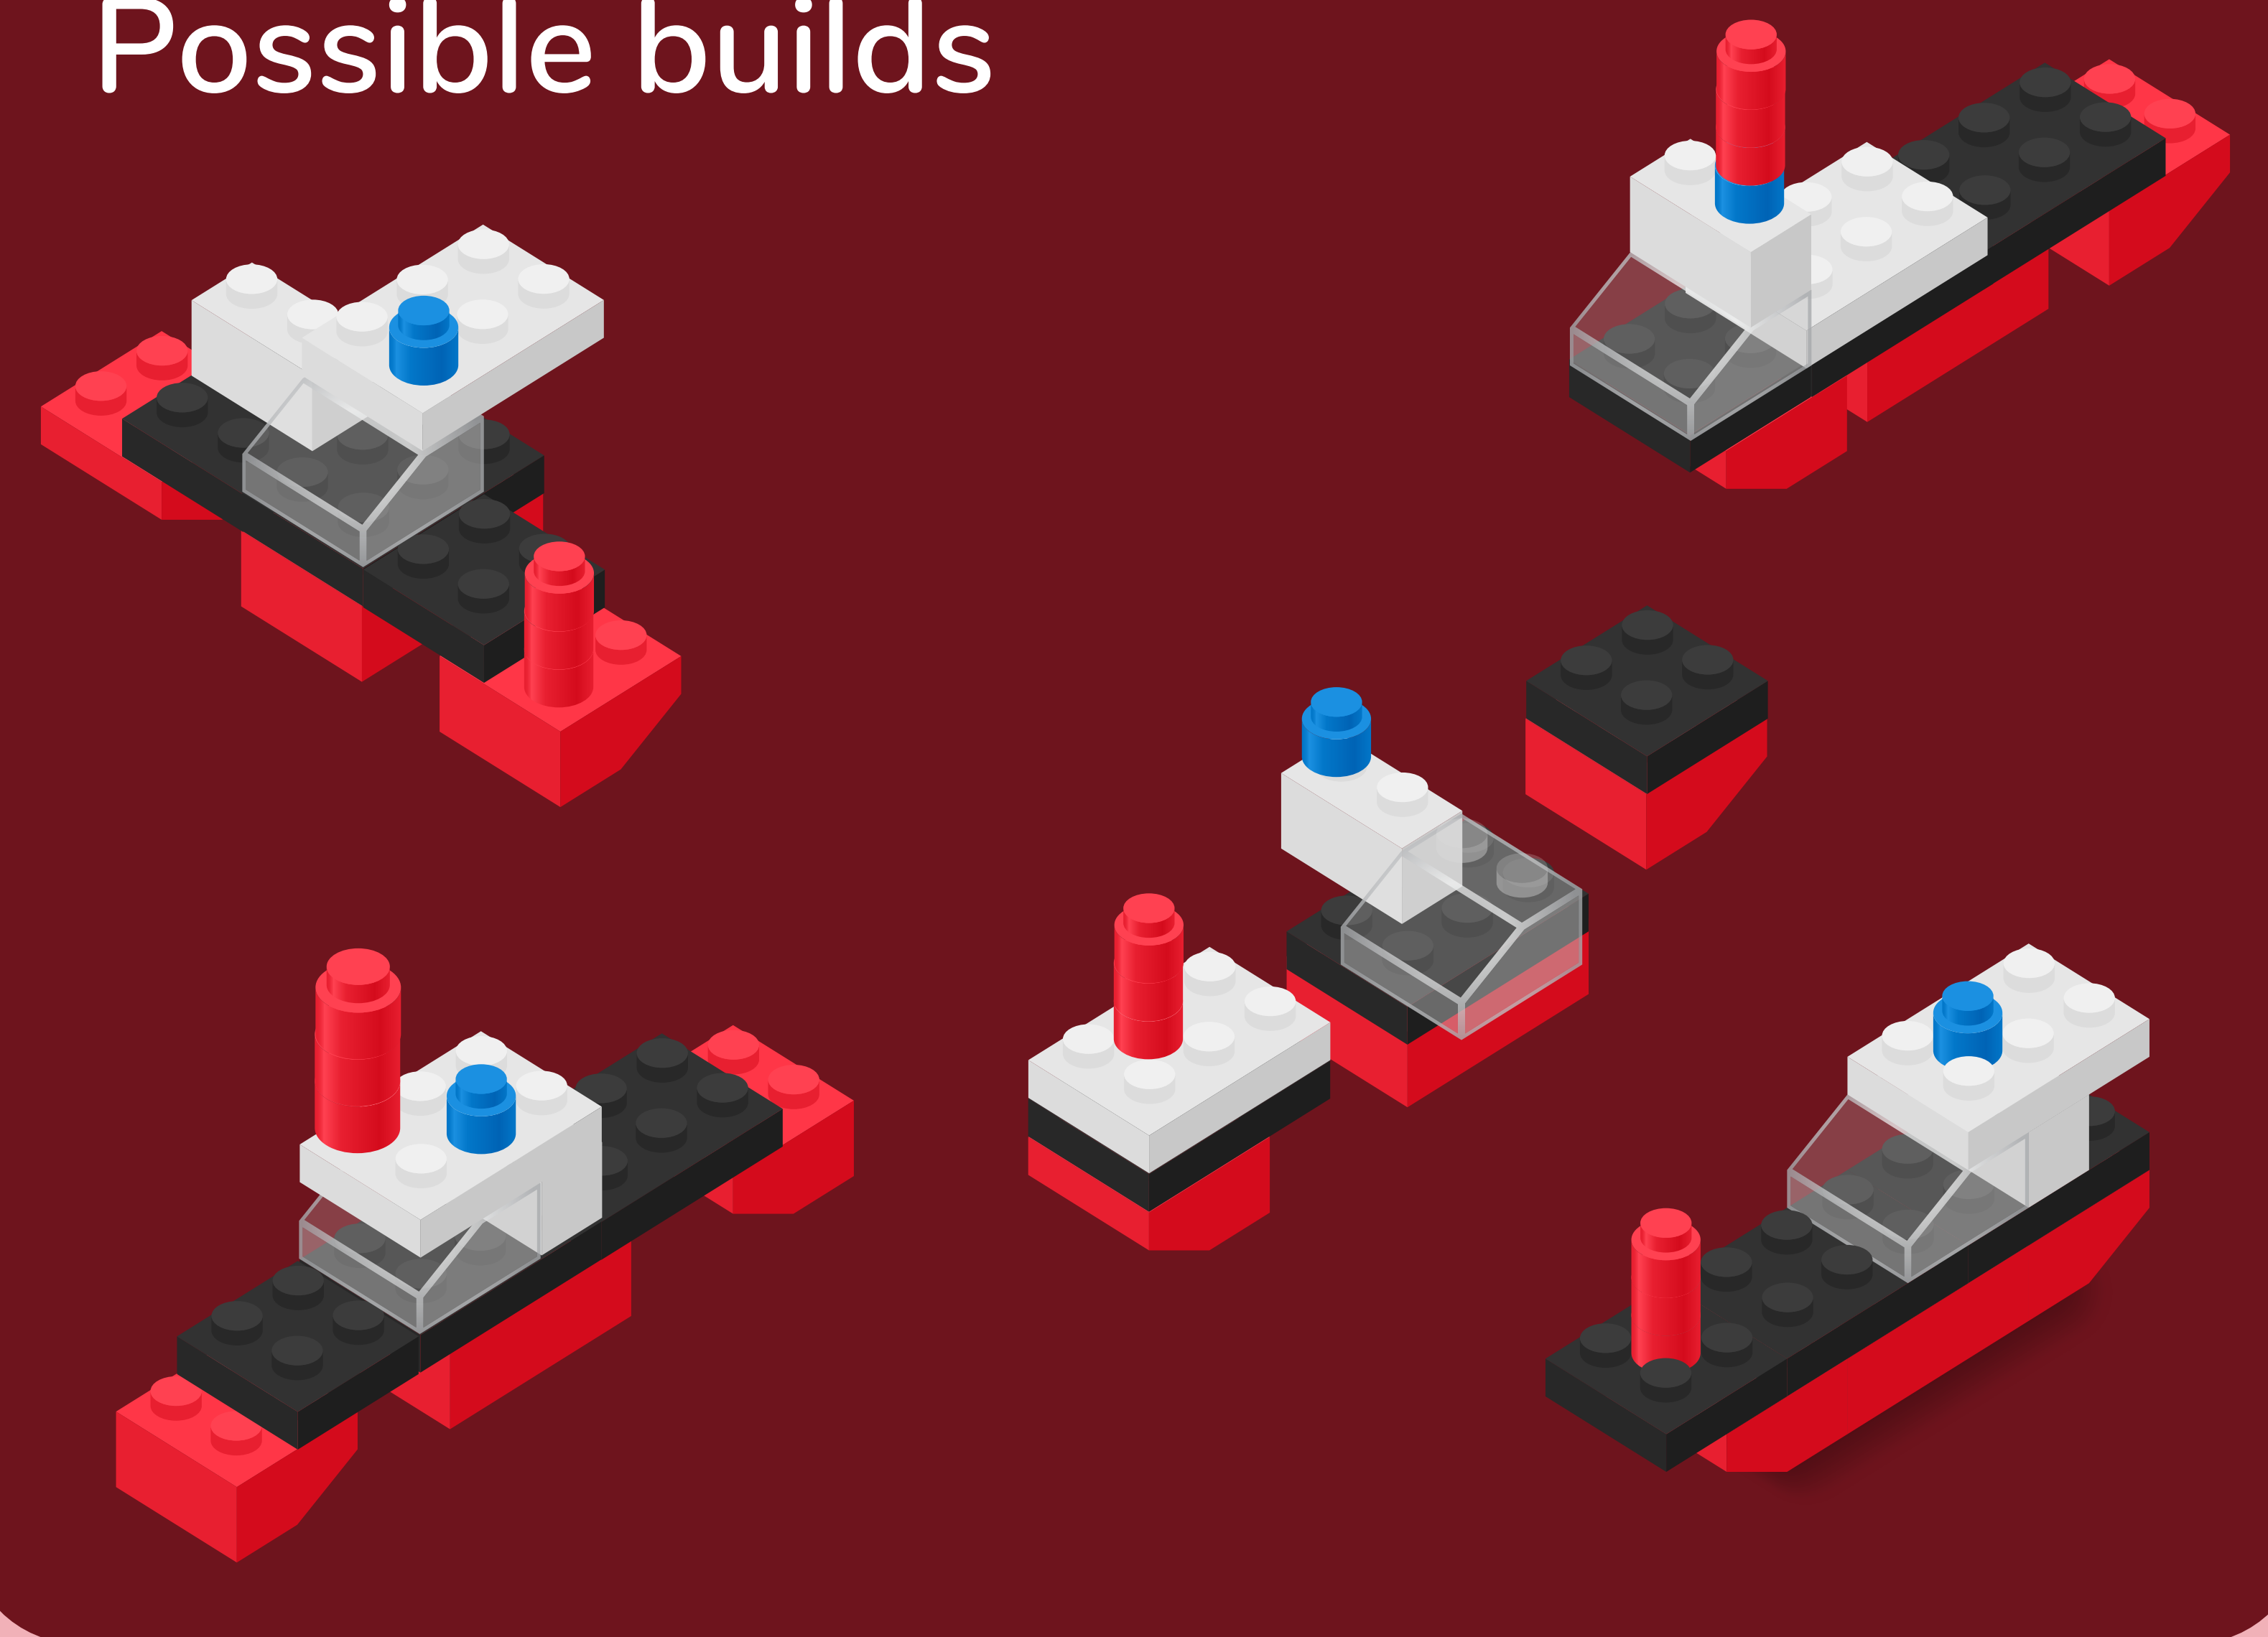

Put the other white piece on the top. Put the blue piece on top of the white.

Put the transparent piece on the top with the white piece next to it.

Make a tower with the little red pieces and put it on the front piece.

Possible builds

Are the instructions good enough?
